WE'RE
HIRING!

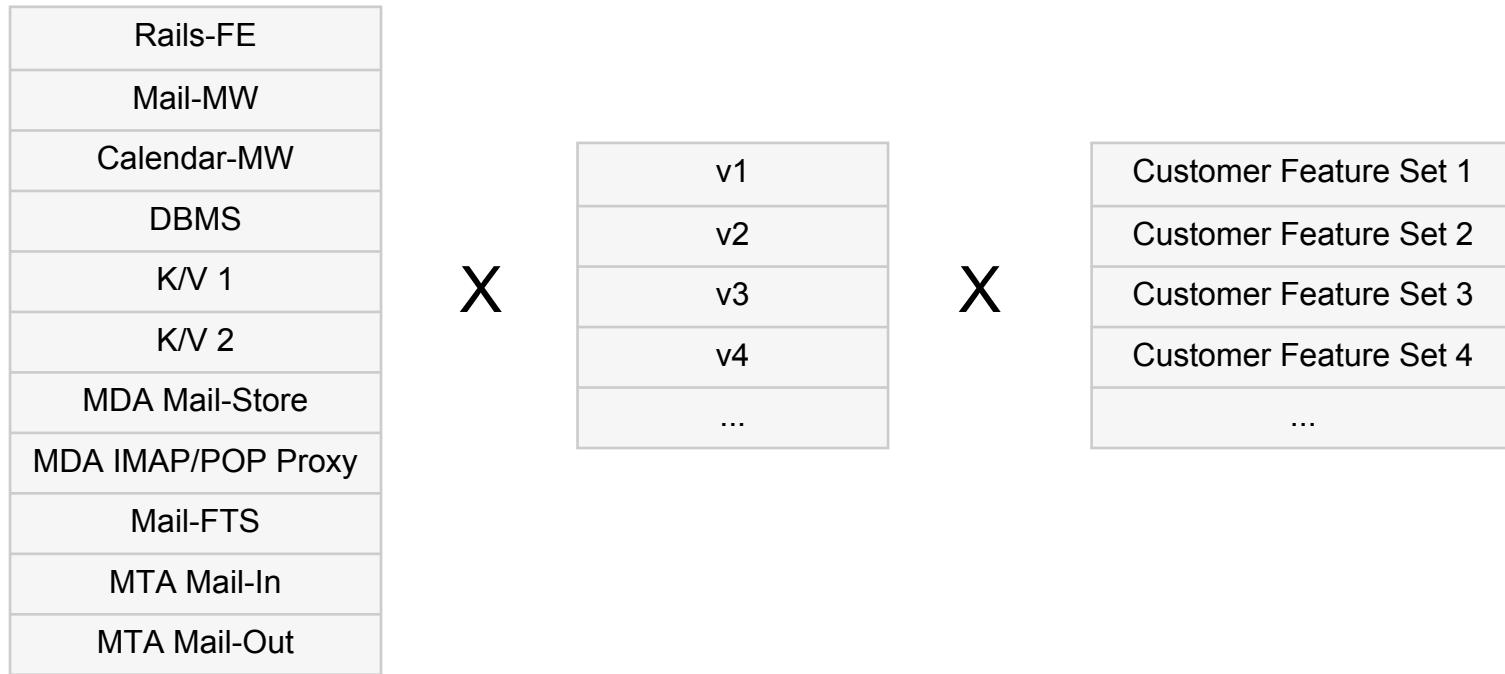

An aerial photograph of a suburban area. In the top left, there's a large building with a parking lot containing several cars. To its right is a road with a few cars. Further right is a residential neighborhood with houses and a circular driveway. The bottom half of the image shows a multi-lane highway with traffic moving in both directions, separated by a median. A grassy field is visible at the bottom left, and a parking lot with a building is at the bottom right.

Scenario

The Product

Test Matrix

Stories from Real World

We can't run integration tests in parallel.

Running all of our tests takes ages.

Our integration tests are fragile.

Producing a bugfix release is hard work.

Time For A Plan

The Plan

1. Git-Pushes go to feature/bugfix branches
2. Every Git-Push triggers a test
3. Tests run in prod-like environments
4. Tests run in isolated/dedicated environments
5. Master branch keeps “stable”
6. Make it easy to improve/add tests

The Plan: Building A Private Travis CI Clone

Travis CI

Travis CI Pipeline

bechtoldt / tabellarius  build passing

Current	Branches	Build History	Pull Requests
		 gitlab-ci Arnold Bechtoldt	test gitlab CI #267 started 87e8861
		 gitlab-ci Arnold Bechtoldt	reduce pep8 warnings #265 passed ea0c10d
		 gitlab-ci Arnold Bechtoldt	fix that damn typo #263 failed e33d870
		 gitlab-ci Arnold Bechtoldt	trying to modify test order #262 failed 817253c
		 gitlab-ci Arnold Bechtoldt	reduce flake8 warnings #259 failed d5a7896

No description provided.

bechtoldt self-assigned this 17 hours ago

bechtoldt added some commits a day ago

- test gitlab CI
- make it export
- add integration for cov test too
- set correct redis port
- reduce flake8 warnings

bechtoldt added some commits 16 hours ago

- trying to modify test order
- fix that damn typo
- reduce pep8 warnings

fix that damn typo
reduce pep8 warnings

coveralls commented 7 minutes ago
coverage 100%
Coverage remained the same at 99.81% when pulling [e33d878](#) on `gitlab-ci` into [8ba7faa](#) on `master`.

Add more commits by pushing to the `gitlab-ci` branch on **bechtoldt/tabellarius**.

Some checks haven't completed yet
2 pending checks

continuous-integration/travis-ci/pr — The Travis CI build is in progress
continuous-integration/travis-ci/push — The Travis CI build is in progress

This branch has no conflicts with the base branch
Merging can be performed automatically.

Merge pull request You can also open this in GitHub Desktop or view command line instructions.

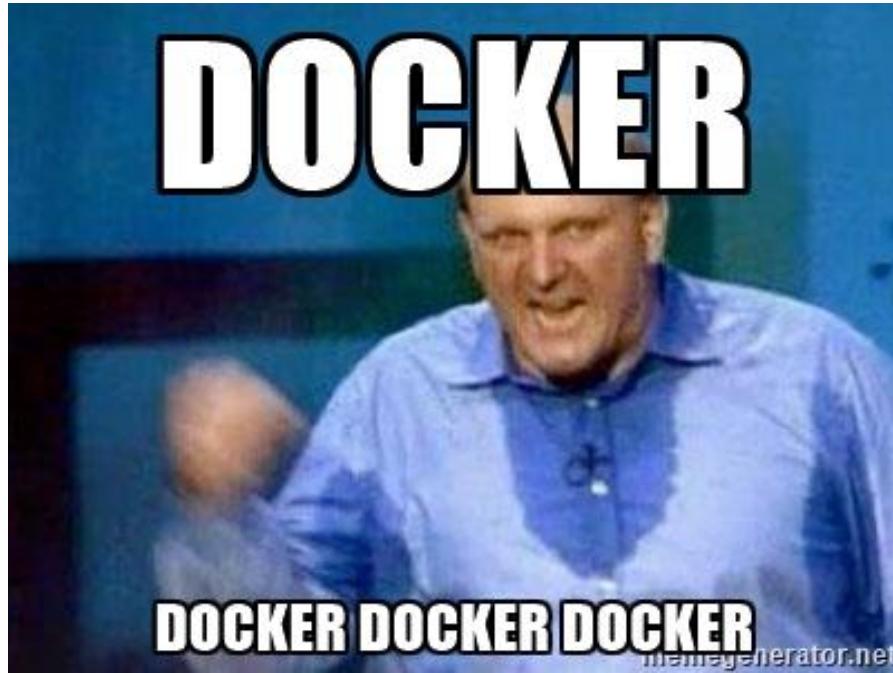

Toolset

Tool	Purpose
GitLab	Git Repository + CI Server
Docker	Container <i>Technology</i>
Docker-Compose	Container/Service Management
Bash + Confd	Image/Container Configuration
Artifactory	Artifact Repository

The background of the slide is a collage of various photographs related to work and study. It includes a person writing in a notebook, a laptop keyboard, a person holding a smartphone, a person's arm resting on a desk, and a person sitting at a desk with a cup of coffee. The overall theme is productivity and professional life.

Conclusions

A voice in my head..

Conclusions

- › Don't underestimate the effort for CI/CD preparation
- › Isolated integration testing at ludicrous speed
- › Infrastructure as Code improves documentation
- › Similarity to production leads to faster bugfixing
- › Parallel testing increases work efficiency
